

Media Release:

Chailease 2021 Securitization Special Purpose Trust Assigned Ratings

April 15, 2022

Rating Action

Taiwan Ratings Corp. today assigned its 'twAAA (sf)' rating and 'twA (sf)' rating to the Class A notes and B notes, respectively, issued by Land Bank of Taiwan as trustee of **Chailease 2021 Securitization Special Purpose Trust (Chailease 2021 Securitization SPT)**. The transaction is backed by a portfolio of Taiwan-dollar-denominated lease and instalment receivables originated by Chailease Finance Co. Ltd.

Rationale

The ratings assigned by Taiwan Ratings Corp. to the rated notes reflect the likelihood of the issuer to pay interest in full on time and to repay principal no later than the legal final maturity date, according to the terms and conditions of the rated notes. Our ratings reflect the following factors:

- The credit risk associated with the underlying collateral portfolio and the credit support available under the Class A notes and B notes are commensurate with our view of credit risk under 'twAAA' and 'twA' rating stress. Our assessment of credit risk also takes into account Chailease's (as the originator and servicer in this transaction) underwriting policy, foreclosure process, business strategy, recent historical performance of the underlying receivables, as well as transaction structure, including but not limited to the amortization triggers, revolving period, and eligibility criteria of receivables that the SPT can invest in.
- The credit support for the Class A notes comprises the subordination of the Class B notes and the Class C notes, while credit support for the Class B notes includes the subordination of the Class C notes only. Any losses on the collateral pool will be absorbed by the Class C notes first, followed by the Class B notes, then the Class A notes. In addition, upon the occurrence of any trust enforcement event, like reaching transaction legal maturity, the transaction can use any balance remaining in the cash reserve amount, together with the remaining underlying receivables, to repay the notes, providing additional credit support for the transaction. We also consider the potential recovery from the margin principals provided by the underlying obligors.
- In our view, the transaction's cash flows can meet the timely payment of interest and ultimate payment of principal to the rated notes by the legal maturity date under stresses commensurate with the ratings assigned. Our rating stresses consider the scenarios including, but not limited to, the assumed default rate and recovery rate under the

respective rating scenarios, stressed prepayment speed, stressed fees and expenses, as well as different default patterns.

- The timely payment of senior expenses/fees and the rated note coupon is first supported by the use of interest, and then if needed, principal collections from the underlying pool of receivables (i.e. principal draw), and lastly an initial cash reserve equal to 0.24% of the initial notes issuance amount. This initial cash reserve will amortize due to factors like the rated note balance that may be gradually redeemed over the transaction life, based on the pre-determined formula stipulated in the transaction document. The timely payment of senior expenses/fees is also underpinned by the additional cash reserve that the transaction will also set aside from the underlying interest collection during the transaction life if the revolving period ceases.
- The transaction has counterparty exposure to Land Bank of Taiwan (twAA+/Stable/twA-1+) as a bank account provider. The rating on the bank account provider, coupled with the replacement trigger of the bank account provider if the rating on it falls below a certain level, is consistent with our counterparty criteria to support the 'twAAA' rating on the rated notes. The rating requirement and replacement language of the eligible investment in transaction documents is akin to the risk as bank account provider, in our view and is also able to support the transaction.
- The operational risk of this transaction, particularly Chailease acting as the servicer, is consistent with our operational risk criteria to support a 'twAAA' rating. Our assessment is mainly underpinned by the transaction's documented provisions regarding servicer termination and replacement, as well as Chailease's franchise value, market position, and experience.
- The legal structure of the trust, established as an SPT under the Taiwan Financial Asset Securitization Act, and the transaction structure and terms, reflects our criteria for asset isolation and insolvency remoteness.
